FREE CALCULATOR

Heat index calculator for outdoor crews

The heat index from air temperature and relative humidity, using the National Weather Service formula, and the risk level OSHA has used to plan protection for workers.

CHART

Heat index risk levels for workers

HEAT INDEX	RISK LEVEL	PROTECTIVE MEASURES
Less than 91°F	Lower (Caution)	Basic heat safety and planning
91°F to 103°F	Moderate	Implement precautions and heighten awareness
103°F to 115°F	High	Additional precautions to protect workers
Greater than 115°F	Very High to Extreme	Even more aggressive protective measures
